

VOLUNTEERING AND LEARNING IN ECO-SUSTAINABILITY

GAIA TERRA ECOVILLAGE

Experiential and educational center for sustainable construction, environmental regeneration and personal and relational growth in North-East Italy

Education and training for young people have a strong impact on the positive transformation of our society and we are thriving to make our world a better place.

WE ARE LOOKING FOR 4 YOUNG PEOPLE
FROM MARCH 31ST TO SEPTEMBER 30TH

During the program, you will be guided in organic farming, healthy plant based nutrition, fermentation to foster probiotics culture, self production of soaps for the body and for the home, bio-building construction and cultural events organisation.

PROGETTO GAIATERRA

Via Petrarca, 45, Flambruzzo di Rivignano-Teor (UD), Italy
GPS: latlng=45.89398082,13.06133866

We are a group of people committed to living a sustainable life, starting from the way we live together: the decisions are made in circle, giving space to emotions and celebrating the community at every meal! Every action of our lives is thought to be the least impacting for the planet and we want to share this style with others through a positive contamination.

FOR THAT, 4 YOUNG VOLUNTEERS ARE WANTED:

one from SPAIN, one from SLOVENIA and two from FRANCE to create a rich, multicultural atmosphere to share information and knowledge for everyone's growth.

To have young people on board will give us the opportunity to develop programs and activities with other local groups of the same generation to create even more ideas on how 'to live lightly on the planet'.

The volunteers are asked to be engaged in activities for 35 hours a week with 2 days off. There will be a tutor following their training everyday and the OLS online program will be available for them to learn Italian.

Costs are full funded by the European Solidarity Corps Program, including travel, accommodation, food and training.
*It is necessary to have the European Youth Pass.

FULLY
FOUNDED

A more inclusive and respectful socially, culturally, economically and environmentally sustainable society is possible if we all commit ourselves from local to global and involve all strata of society, specially the younger generations in experiential learning and foster their follow-up in their places of origin.
